ABOUT THE PUBLISHER

Fringe Global Scientific Press is an international online open access academic publishing group that began with the goal of spreading and disseminating high-quality research and scientific data via open access throughout the globe. We encourage the publication of high-quality, current scientific research papers from a variety of areas, subjecting them to a thorough peer-review procedure. We bring together world-renowned, peer-reviewed publications to provide verified and complete information to the scientific and research communities in a variety of areas.

Scope

The scope of **Fringe Global Scientific Press** publications encompasses a wide range of subjects pertaining to the fields of science, management, and technology. Journals undergo constant updates to include high-quality scholarly articles under an open access model, ensuring unrestricted internet accessibility for all individuals without any financial barriers.

Mission

The primary mission of **Fringe Global Scientific Press** is to facilitate and engage in collaborative multidisciplinary research using cutting-edge techniques and technology. We aim to integrate technical aspects of research with theory and provide an effective interdisciplinary platform for academic development and industry.

Vision

Our vision is to provide a reliable and reputable publication platform that caters to both emerging and established researchers, enabling them to contribute to the advancement of scientific knowledge in many academic disciplines.

Core Values

- Our review process is conducted with **integrity**, ensuring rigorous evaluation of submissions.
- We value **innovative research** that advances current knowledge and contributes to key areas.
- We foster an **interdisciplinary platform** that drives collaboration between academia and industry.
- We promote **open access** to cutting-edge research for the global audience.
- We adhere to the highest **ethical standards**, ensuring originality and proper attribution.

CONFERENCE AIM

This conference is organized by the **Fringe Global Scientific Press**. The **International Conference on Recent Innovations in Social Development (ICRISD) 2026** aims to present current research and foster collaboration between researchers, academics, engineers, students, and industry experts worldwide. This premier event provides an excellent platform for networking, sharing experiences, learning about cutting-edge innovations, and exploring future research collaborations. Featuring distinguished international speakers and competitive Best Paper Awards, ICRISD 2026 recognizes outstanding contributions advancing social development through innovation.
